<b>Total Budget:</b> \$36,353,000.00		

### Disasters:

#### Declaration Number

FEMA-4438-OK

### Narratives

#### Disaster Damage:

On May 7, 2019 flooding and severe weather began, creating damage to roads and bridges and bringing Keystone and Kaw lakes to 86 percent and 47 percent flood pool respectively. The U.S. Army Corps of Engineers(USACE) declared an emergency to allow for emergency operations support including levee assessments. Rain and flooding continued for several days and USACE began releasing water from Keystone and Kaw dams.

On May 20th, tornadoes, straight-line winds, large hail, and heavy rain began early in the day and continued into the morning hours on May 21st. Severe weather and heavy rain continued for more than a week, causing evacuations in at least a dozen counties and leaving more than 1,000 homes damaged. Several neighborhoods and communities were evacuated in Kay, Logan, Muskogee, Nowata, Ottawa, Sequoyah, Tulsa, and Wagoner counties. The Arkansas River at Muskogee recorded the second largest crest on record.

On June 1, 2019, the President declared that a major disaster exists in the State of Oklahoma due to severe storms, straight-line winds, tornadoes, and flooding during the period of May 7 to June 9, 2019. As of June 20, 2019, twenty-seven (27) counties in the State of Oklahoma have been declared for FEMA Individual Assistance (IA) based on severe storms, straight-line winds, tornadoes and flooding from May 7, 2019 to June 9, 2019 (DR-4438). These counties are Alfalfa, Canadian, Cherokee, Craig, Creek, Delaware, Garfield, Kay, Kingfisher, Le Flore, Logan, Mayes, Muskogee, Noble, Nowata, Okmulgee, Osage, Ottawa, Pawnee, Payne, Pottawatomie, Rogers, Sequoyah, Tulsa, Wagoner, Washington, and Woods.

#### Recovery Needs:

The State of Oklahoma will address housing and infrastructure unmet needs as detailed in the State's 2019 CDBG-DR Action Plan.

Based on FEMA data gathered at the time of the disaster, the total number of residences impacted was 913. 335 were destroyed, either because of a total loss of structure, the structure not being economically feasible to repair, or a complete failure to major structural components such as a collapse of the basement, walls, roof, or foundation. 517 were declared to have major damage, meaning substantial failure to structural elements of residences such as walls, floors, foundation, or damage that will take more than 30 days to repair. 38 residences received minor damage, meaning the home is damaged and uninhabitable but could be made habitable in a short period of time. 23 residences were considered affected, meaning some damage occurred due to the structure and contents, but was still considered habitable. The cost due to serious unmet need in the HUD MIDs alone is estimated to be \$24,206,420.00. Due to the housing needs found, counties, cities and towns provided ODOC with their current unmet needs. These needs included acquisition of flooded/uninhabitable properties, rehabilitation/reconstruction of damaged homes, reimbursement of LMI homeowners who used loans or their own personal finances to repair damages and reconstruction of multi-family housing that had been destroyed in the disaster. These needs became apparent after the disaster and are still needed after 2 years into the recovery process.

All 27 counties have infrastructure needs based on FEMA Public Assistance (PA) data. These include debris removal, protective measures, public building repairs, public utility repair, recreational or other repair, roads and bridge repair, state management, and water control facility repair. The estimated total amount of funds required for Public Assistance is \$11,678,317.70. Counties and cities reported a need for improved stormwater management systems, the repair of damaged infrastructure, and resiliency/protective measures for infrastructure.

CDBG-DR applications are scored competitively. Additional points for applications may be available for those projects that support housing for vulnerable populations. This includes, but is not limited to transitional housing, permanent supportive housing, permanent housing needs of individuals and families that are homeless or at-risk of homelessness, and persons who are not homeless but require supportive housing such as elderly, persons with disabilities, persons with alcohol or other drug addiction, persons with HIV/AIDS and their families, and public housing residents.

Updates to the Action Plan (Substantial Amendments)

Substantial Amendment #2:

The proposed changes in the State’s Action Plan are a Substantial Amendment because there is a change in program benefit and eligibility criteria for the Voluntary Buyout Program under Housing Activities, a proposed deletion of activities (all funds removed from the line-item budget) for Reimbursement of subsidized loans and Multi-Family Rehabilitation and Reconstruction, and therefore, a reallocation of more than \$3.6 million dollars.

ODOC is proposing to reallocate funds from Single Family Reimbursement (owner occupied), Multi-Family Rehabilitation and Reconstruction, and Multi-Family Housing Reimbursement. Funding for these programs would be better used for activities that have unmet needs, and it is for this reason ODOC is proposing these budgetary changes. The Single-Family Reimbursement and Multi-Family Rehabilitation programs accepted applications on a rolling basis for over six months, and ODOC received no applications or interest.. Funds from each of these programs are being reallocated to the Voluntary Buyout Program, Public Facilities and Improvements, and Planning.

The Voluntary Buyout Program budget increase was developed after numerous conversations with ODOC and its potential subrecipients. All entities agreed that the buyout program cap of \$110,000 was too low as is currently approved in Substantial Amendment #1. After further discussions, ODOC found that the other HUD-identified MIDs were interested in offering a buyout of residential structures in the 100-year floodplain and Disaster Risk Reduction Area (DRRA). However, \$110,000 remained too low for these communities to submit a CDBG-DR application.

Public Facilities and Improvements requires additional funding because Muskogee County, a HUD identified Most Impacted and Distressed Area, revised the cost that would be necessary to address infrastructure unmet needs.

For the Planning program, the Oklahoma Water Resources Board (OWRB) is conducting a statewide flood plan for all 77 counties in the State of Oklahoma. The program requires additional funding for a more detailed hydrological analysis in the Arkansas River watershed, which encompasses all three HUD identified Most Impacted and Distressed Areas (Zip code 74946, Muskogee County, and Tulsa County).

Activity Description:

The State is entitled to a maximum of 5% of the total CDBG-DR allocation and will act as the lead agency for the overall administration of the CDBG Disaster Recovery funding. Together, Planning and Administration are capped at 20% of the total grant allocation. Of this, by regulation up to 5% of the grant can be used for administration. The State will administer and utilize sub-grantees to disburse the CDBG Disaster Recovery funding directly to benefit homeowners, multifamily property owners, and other eligible beneficiaries of the funding. Administration of the CDBG Disaster Recovery funding by the State will ensure that program activities reach affected residents in a consistent and coordinated manner. The State will implement the programs and activities detailed in this Action Plan primarily through dedicated staff, consultants, and third-party contractors

Activity Description:

Statewide floodplan to determine future projects to mitigate disasters and increase resiliency. Further in depth analysis will occur on the Arkansas River watershed, which includes all three HUD-identified MIDs. Develop a dynamic OFP, integrated with the Oklahoma Comprehensive Water Plan (OCWP), which raises risk awareness, motivates actions to reduce flood risk, and serves as a statewide roadmap for long-term flood resilience. The plan is intended to be complementary to existing programs such as the FEMA's Cooperative Technical Partners and Community Assistance Program- State Support Service Element programs. The plan will build on CTP mapping efforts to identify mitigation projects. It will also provide a high-level foundational structure whereby facilitating communities across the state to initiate in-depth coordinated floodplain management programs. The plan shall include: An evaluation of the condition and adequacy of flood control infrastructure on an OCWP defined watershed basis; A high-level state-wide list of ongoing and proposed flood control and mitigation projects, a list of strategies to protect against the loss of life and property from flooding and a discussion of how those projects and mitigation strategies might further enhance water supply development including the capture of flood waters where applicable; An analysis of completed, ongoing, and proposed flood control projects included in previous flood related plans/programs including which projects that received funding; An analysis of

completed, ongoing and proposed flood hazard areas, as defined by FEMA. Assess those areas that remain to be mapped or need to be remapped; Legislative and policy recommendations OWRB considers necessary to facilitate flood control planning and project construction which may include future funding requests at the state and national level for the State Flood Resiliency Revolving Fund.

In addition to the statewide flood plan, OWRB will perform a more coordinated in-depth hydrology and floodplain analysis in the Arkansas River watershed, which will address data gaps identified by the Phase 1 portion of the statewide flood plan.

Activity Description:

OWRB Phase II

In Substantial Amendment #2, the State has increased funding to the Planning Activity in the amount of \$500,000. OWRB will use the additional funds to conduct a second phase of the State Flood Plan that includes developing hazard mitigation projects and alternatives within the Arkansas River watershed, which encompasses all three HUD identified Most Impacted and Distressed areas (Tulsa County, Muskogee County, and the Moffett Zip code). OWRB will prioritize projects for Phase 2 and include at least one project in each of the three MID areas. Depending on the projects prioritized for coping in Phase 1, work in Phase 2 may include:

1. Scoping and developing hazard mitigation projects and alternatives, including engineering design and feasibility studies. Oklahoma Department of Commerce 2019 CDBG-DR Action Plan Non-Substantial Amendment No. 4 137
2. Conducting meetings, outreach, and coordination with potential subapplicants and community residents.
3. Incorporating environmental planning and historic preservation considerations into project planning activities.
4. Collecting data for Benefit-Cost Analyses, environmental compliance, and other program requirements.

- 5. Conducting hydrologic and hydraulic studies for unmapped flood zones or other areas where communities propose to submit hazard mitigation projects.
- 6. Coordinating, scoping, and developing regional or multi-community hazard mitigation projects that require coordination to address resiliency and sustainability goals cohesively.
- 7. Utilizing third-party cost estimation services for project budgeting across sub-applications.

**Activity Description:**

This project consists of a CDBG DR-2019 Voluntary Buyout Program (Disaster Declaration 4438) for the Town of Moffett, Oklahoma. The Eastern Oklahoma Development District (EODD) will conduct a Voluntary Buyout Program (VBP) for the Town of Moffett, located in Sequoyah County, Oklahoma. The entire Town of Moffett was inundated by flooding that occurred from May 7, 2019 through June 9, 2019. The historical flooding led to Disaster Declaration 4438. This project will voluntarily buyout properties and convert them to open space, green space, recreational space, or floodplain management areas in perpetuity. EODD will primarily attempt to identify, support, and relocate Low-to -Moderate (LMI) persons in moving from the 100-year floodplain, floodway, and Disaster Risk Reduction Area. EODD will attempt, through the VBP, to locate and serve non-LMI property owners under the Urgent Need (UN) national objective to assist them in relocating to reduce loss of life and future flood damages on a Case-by-case basis, with prior approval from ODOC.. Thus, the project will reduce the repetitive loss for the Town of Moffett.

**Activity Description:**

The Tulsa County residential flood recovery program, consistent with the States 2019 CDBG-DR Voluntary Buyout Program, is intended to help eligible Oklahomans relocate from the 100-year floodplain, floodway, or Disaster Risk Reduction Area. The goal of this program is to voluntarily buyout such properties and convert them to open space, green space, recreational grounds, or floodplain management areas. Participants will receive an incentive to purchase a new home. Properties purchased with CDBG-DR funds shall be deed-restricted to remain as green space, recreational space, or floodplain management areas in perpetuity. Residential or commercial development on properties acquired is prohibited. The proposed project will acquire and demolish residential properties impacted by the 2019 flooding in Tulsa County, Oklahoma. Eligible Areas for this buyout program have been documented in detailed maps. These maps outline 6 specific eligible Target Areas of Tulsa County, that were most impacted by the disaster event. Within these maps, the county has outlined the 100-year floodplain as mapped by the most current Federally issued Flood Insurance Rate Map (FIRM). Furthermore, the County has identified the 500-year floodplain or .2% Annual Chance of Flood Hazard as the Disaster Risk Reduction Area. The County will utilize GPS services to plot each participating address to document that it is located within an eligible Target Area, as well as within the 100year of 500-year floodplain as applicable.

As noted in the program guidelines, the County will prioritize LMI and 100-year floodplain applications first and foremost.

Activity Description:

This project will rehab the town's lagoon system, including raising the earthen dams of the system to levels above the new Base Flood Elevation (BFE) for the town. Additionally, it will add a chemical feed building, an updated control system, piping & valves, and a new standby power generator with automatic transfer switching capabilities. This project entails raising the dam elevations on a two-cell wastewater lagoon system. ODOC considers two structures in total will be raised since both lagoon cells are isolated from one another.

Activity Description:

This project will include work on approximately 2.7 miles of road including; Secure utility easement, Clearing and grubbing, stabilizing sub-grade, raising road bed with aggregate fill, installing drainage pipes, replacing wooden deck bridges, installing asphalt overlay, roadway striping, reinstall fencing. Proper ditches and drainage will be re-established on both sides of the road in order to direct stormwater off of the road and to the drainage outlets. Replace two bridges and drainage pipes along ditches that were damaged, excavated, or clogged during the flood. Apply an asphalt overlay on the entire road along with roadway striping.

This is a farm-to-market road that is accessible for businesses and farmers to cross the Neosho River from the Town of Fort Gibson to the City of Muskogee and the Town of Okay. The DR-4438 flood event began cresting the river on May 22, 2019, near this location and inundated this entire road under 6-8 feet of swiftly moving water by May 23rd. The roadbed and the driving surface remained under water for over 14 days.

Increasing the elevation of the Roadway above the Base Flood Elevation will require the widening of the road base. This widening is going to require the acquisition of 5' of additional right-of-way, on both sides of the road. The land along the roadway is primarily farmland, and the houses that are in the project area are far enough removed from the roadway that we anticipate no displacement or negative impact.

The DR-4438 flood event began cresting the river on May 22, 2019, near this location and inundated this entire road under 6-8 feet of swiftly moving water by May 23rd. The roadbed and the driving surface remained under water for over 14 days.

Increasing the elevation of the Roadway above the Base Flood Elevation will require the widening of the road base. This widening is going to require the acquisition of 5' of additional right-of-way, on both sides of the road. The land along the roadway is primarily farmland, and the houses that are in the project area are far enough removed from the roadway that we anticipate no displacement or negative impact.

Activity Description:

The Town of Marble City is located on the side of a hill. Main Street is one mile long, running North and South along the bottom of the hill, continuing outside the city limits to local county residential areas. Other residential streets in town run East and West, and average about two blocks long. One main county road, N 4620 Rd, runs east-west through town in conjunction with Seminole Ave. Seminole Ave is one mile long, running from the top of the hill on the east side, to Main Street at the bottom of the hill, and continuing across the railroad tracks and out of town on the west side. Main Street and Seminole Ave are completely asphalted and meet at the only four-way stop (intersection) in town. All other streets and avenues are dirt and gravel. Using CDBG-DR grant funds the Town of Marble City will conduct the following activities:

1. clean/rebuild damaged drainage ditches

2. replace damaged culverts to residential driveways from city streets

3. replace curbing on Main street

4. replace damaged concrete culverts under Main street

5. replace damaged metal culverts under Main street and side streets

6. replace damaged concrete-lined drainage ditches

- 7. replace damaged sidewalks
- 8. replace damaged open drain with sidewalk, curb and gutter
- 9. repair chip and seal damaged town streets
- 10. replace damaged metal culverts along upper city streets
- 11. patch asphalt
